

## **Health Services State Questionnaire Content**

*This is a list of the major topics covered in the state-level health services questionnaire. For more detailed information on the content of the study questionnaires, you may visit the project web page at [www.rti.org/shpps](http://www.rti.org/shpps).*

- state required health services offered to students
- parent or guardian consent requirements for providing health services to students
- information schools keep in student records about health topics or issues
- immunizations or vaccinations required before entering school
- documentation required for students to self-medicate
- state policies on students and faculty who have HIV or AIDS
- state policies on student injuries or illnesses that occur at school
- required health screenings districts or schools conduct for students
- required ratios of students to health services staff
- required ratios of schools to health services staff
- staff development provided to school nurses or other school health services staff
- collaboration between state education agency staff and other state agencies on school health services projects
- state policies on contracts or other arrangements that schools may have with non-school based organizations to provide health services to students
- credentials that school nurses or other school health services staff are required to have
